

Implement a Program on Packages.

1)

//Save by A.java package

mypack;

public class A

{

 public static void msg()

 {

 System.out.println("Welcome to Package!!");

 }

}

//Save by B.java

package mypack; import

mypack.*;

class B

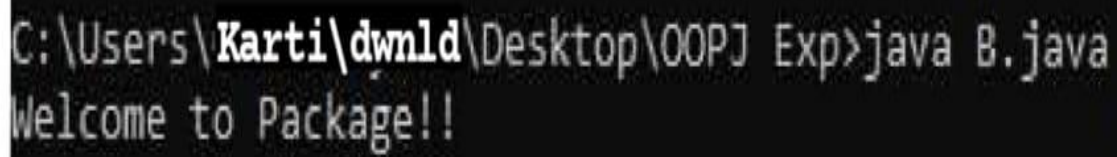

{

 public static void main(String args[])

 {

```
        A obj=new A();  
obj.msg();  
    }  
}
```

Output:

```
C:\Users\Karti\dwml\Desktop\OOPJ Exp>java B.java  
Welcome to Package!!
```
