

```
class Singleinheritance{  
    public static void main(String args[]){  
        Dog d=new Dog();  
        d.bark();  
        d.eat();  
    }  
}  
  
class Animal{  
    void eat(){System.out.println("eating");}  
}  
  
class Dog extends Animal{  
    void bark(){System.out.println("barking");}  
}
```

### OUTPUT:

```
C:\Users\ABC\Downloads\EXPIREMENT\single inher> java Singleinheritance.java  
barking  
eating  
C:\Users\ABC\Downloads\EXPIREMENT\single inher>
```
