

1. class Loading

```
{  
    public static void main(String[] args)  
    {  
        System.out.println(Overloading.area(5));  
    }  
}
```

2. class Loading

```
{  
    public static void main(String[] args)  
    {  
        System.out.println(Overloading.area(5));  
    }  
}  
  
public class Overloading  
{  
    static double area(int r)  
    {  
        return 3.14 * r * r;  
    }  
}
```
